

COMPANY FACT SHEET

Clientia, *in brief.*

Clientia is a private client-operations platform that unifies licenses, contracts, retainers and recurring payments into a single, calm workspace — so a firm's relationships feel handled, not administered. The essentials are below; for interviews or additional material, the press contact is at the foot of this page.

WHAT IT IS

A client-operations platform for professional-services firms. It replaces the spreadsheets, inboxes and disconnected invoicing tools that fragment client work, keeping billing, legal and access state in one shared, always-current record.

WHO IT'S FOR

Private practices, retained studios, agencies, family offices, law firms and other professional-services teams — and the RevOps, client-success and finance operators who run those relationships day to day.

THE PRODUCT

Five modules across one workspace:

01 Clients

A living record of each relationship — tier, contacts, history and health.

02 Contracts

Templates, redlines, e-signature and a trustworthy audit trail.

03 Licenses

Seat provisioning, reassignment and renewal alerts.

04 Payments

Retainers and invoicing that reconcile themselves.

05 Intelligence

Health scoring and churn signals, surfaced early.

STAGE

In development · early access. Clientia is admitting a small number of firms in early cohorts as the product matures, via a waitlist.

PRICING MODEL

Three self-serve tiers — **Studio**, **Atelier** and **Maison** — plus Enterprise. Priced on the number of active clients a firm manages, with a 14-day free trial and 20–25% savings on annual terms.

DATA & SECURITY

Built GDPR-, CCPA- and HIPAA-ready, with EU or US data residency. Funds settle to the firm's own accounts; Clientia sits as a front-end on existing payment rails.

PARENT COMPANY

AG Web Studios — a Danish design-and-engineering studio (CVR 45281043), founded 2025 by Aksel Glyholt and based in Nykøbing Falster, Denmark.

FOUNDER

Aksel Glyholt — founder and engineer. Builds the product end to end. (A separate founder media sheet is included in this kit.)

HEADQUARTERS

Nykøbing Falster, Denmark · made quietly in Denmark, serving firms in the EU and US.

FOUNDED

Clientia originated within AG Web Studios (est. 2025); the platform entered early access in 2026.

In one line

Clientia is the quiet operating table for discerning firms — every thread of the client relationship, from first contract to monthly collection, held in one place.
